

Art Students 7th grade and Art I-II,

To make this process as simple as possible, 7th-12 grade will have the same art assignments and I will grade them based on your skill level. Please do not wait until the last minute to complete your assignments. I will give due dates as I post these assignments. I know you have a lot on your plate right now, but you need your art credit. Complete assignments as I post them and turn in as soon as you are finished. Please email me a photo of your finished artwork. **I plan to use google classroom from here on out, so after this initial assignment, you will find assignments there along with additional directions.**

You should be able to get the materials together for this project. I'd like you to make 2 of these figures, each in a different "pose."

Parents, please text me or email if you or your student have any questions!
769-223-3169. Hbaker@shshattiesburg

Aluminum Foil Figures Due Date: March 27th

Materials:

- [Tinfoil](#) – one roll per 25 students
- [Newspaper](#) (could also use plaster strips if allowed) for paper mache and to cover desks for easy clean up
- Paper mache paste (This can be made with glue and water or flour and water): Watch this paper mache video:

<https://www.youtube.com/watch?v=-Uas0CAIaI4>

- Acrylic or Tempra Paint
- Paint brushes, water containers, paint trays

Instructions:

- Review `form` as an Element of Art
- Review Dance shapes or movement forms (Twist, Bend, Stretch, Curve, Angle, Spin, Twirl)
- Sketch out possible dance shapes before beginning with foil. Save your sketches to send to me.

- Make two cuts 5 inches deep in the top of the tinfoil
- Make one cut at the bottom of the tinfoil 5 inches deep

- Form a head from the middle piece at the top
- Form two arms on either side of the head

- Form the legs of tin foil person
- Ensure the either one leg or arm is able to be glued to a piece of cardboard as a stand

- Rip newspaper up into long thin strips (could also use plaster strips)

- Put newspaper one piece at a time into paper mache glue and smooth it out around your tin foil person
- Let dry for 24-48 hours then apply paint after a quick lesson on the colour wheel and colour selection
- Once dry students can add features and details with a sharpie marker
